Gerber Granger 13G

Granger breeds light birth weight with explosive growth, along with that early sexual maturity and fleshing ability. He is a full brother to Watchfire which has a lot of breeder acceptance. He has certainly had a place here being used on first calf heifers and for his carcass merit. The Granger females have made exceptional cows.

285M is regarded by many as one of the very top proven total performance sires in the breed. He is a trait leader for yearling weight, milk, milk and growth and marbling. When you do a sire sort for low birth, high growth sires with a lot of carcass, he comes straight to the top. We purchased the spring possession in him a year and a half ago. We could not be more pleased with his first calves. Owned with 4L Farms and Churchill. Selling 1/4 interest and spring possession.

Ultimatum is the most unique individual our Hereford program has ever produced. Part interest sold in our spring 2004 sale to long-time commercial customer Jim Colborn, Medicine Lodge. We have big plans for Ultimatum and used him natural service on the majority of our mature cows last spring. How many Hereford bulls in North America can match his combination of calving ease, growth and carcass? One. Only one other bull in the horned Hereford breed can match Ultimatum's unique EPD profile. You will hear more about Ultimatum.

This is sure an outlier for carcass traits as his IMF ratio is 141 and REA is 106. You just do not find that combination very often. When you add in his WI of 111 and YI of 101, it really gets your attention. If you are looking for carcass—here is your bull.

Another of those total performance bulls that has a WI of 113 and then a YI of 109. When you add in a REA ratio of 112 and IMF of 107 you know you have the total package.

These Ultimate bulls seem to be somewhat alike as this bull has performed well. His WI-106, YI-101, REA-113 and IMF-114 certainly puts him in the top of this set of bulls.

This almost seems like a broken record but the fact remains these bulls are really that good. His WI-119, YI-103, REA-116 & IMF-106 ratios certainly makes him fit in to that top group.

This bulls dam has really been a top producer but raised this guy toward the end of her productive life. When you know all the progeny that she has put back into our herd it really makes you appreciate this bull.
