His dam is one of those cows that we all try to find—smaller framed that puts all her production in her calf and not on her back. She sells as Lot 279 and her heifer calf as Lot 293 [V906]. Another bull that combines low birth and growth in the same genetic package.

A "Profit Plus" bull that is black hided but carries the red gene. Used on black cows you would get almost all black calves and 50% black from red cows. All of these black bulls are produced from a part of our program that consistently produces at the top. His dam has an MPPA of 107.7 as he weaned with a WR of 113 and went on to a YR of 107.

												FAT	0.01

Probably one of the top herd sire prospects in the sale with a 111 WI, 108 YI. Then having a 16.33" ribeye which ratioed 125 while his IMF was 103. When this is combined with a foolproof pedigree you cannot go wrong.

												FAT	0.01

These next 3 lots are flush brothers out of R5701 from the Osce cow family. Combining her with Judge gave some moderate framed bulls that would certainly add some uniformity to a calf crop. A real solid set of bulls that do not have ratios since they are ET.

Another of the "Profit Plus" bulls that is black hided but carrying a red gene. One of the highest IMF ratios at 138 should add to his appeal.

Much the same story here, a "Profit Plus" bull, being black hided with the red gene. His dam has a MPPA of 105.3 and his ratios were all above 100. You get a lot of bang for your buck with these guys.

This almost seems like a broken record but the fact remains these bulls are really that good. His WI-119, YI-103, REA-116 & IMF-106 ratios certainly makes him fit in to that top group.
